1 ORGANISATIONAL OVERVIEW

- **NAME OF THE ORGINISATION:** CAKE HEAVEN
- **ORGANISATIONAL HISTORY:** Growing up, I was grandma's taste tester every Sunday after church. I sat on a chair in her flour dusted kitchen learning that best recipes are not found in a book, they are felt, she taught me that a perfect crust requires cold butter and a warm heart. After granny passed away, baking became my way of staying

connected to her. When friends started offering to pay for grandma's style, I realized her legacy was too good not to share. That is when I started cake heaven ON 20 MAY 2022.

- **MISSION:** Our mission is to share the joy of homemade cakes with families and friends, keeping traditions alive while making order simple and convenient. We believe every cake tells a story, one of celebrations, love, and creativity. Through our website, we aim to make it easy for customers to experience that joy from the comfort of their homes. Cake Heaven stands for warmth, quality, and the personal touch that turns ordinary moments into sweet memories.
- **VISOIN:** In the future we hope to become established as a provider of homemade cakes that you can trust to deliver excellent products with caring service. We hope to expand further than serving local areas and meet new customers who appreciate homemade quality. We hope to blend the old traditions used in baking but also embrace new technology to make Cake Heaven your one-stop-shop for all things home baking including family and celebration.
- **TARGET AUDIENTS:** For those who long for that homemade taste that grocery stores have been trying to mimic. For the busy moms who want to give their children homemade goodies. For the local junkies/conscious consumers who believe in small businesses with heart and a story instead of large corporations. Lastly, for celebrational reasons you could be throwing a birthday or wedding. Any celebration really.

2 WEBSITE GOAL

- SEO-optimized for new customer attraction: Ensure the website is search engine optimized and connected to social media to draw in new customers.
- Ease of use for customers: Customers should be able to easily browse the selection and place orders/payment. The website should be optimized for mobile phones as well.
- Beautiful display of cakes/pastries: High resolution pictures of cakes and pastries should be included on the site. Description of the cake/pastry should explain the creation and taste.
- Ability for customers to connect: Include links to a feedback page, testimonials, and contact us with inquiries.

- Ability to grow your business: Website should include analytics to view traffic and what desserts are most popular.
- Helps brands Cake Heaven: Include the warmth, creativity and professionalism that Cake Heaven provides.
- Responsive and secure: Website is mobile responsive and secure for customers.

3 PRESENT KEY INDICATORS:

- We track the following: Daily cake orders- how many cakes leave the kitchen each day, profit per cake, repeat customers, wasted cakes, social media responses

4 PROPOSED WEBSITE FEATURES

- Home Page: Welcome message introducing Cake Heaven, our story, some featured cakes, and currently available seasonal flavors.
- Products and services: Clean and easy-to-navigate area where customers can explore cakes on occasion - birthdays, weddings, cupcakes.

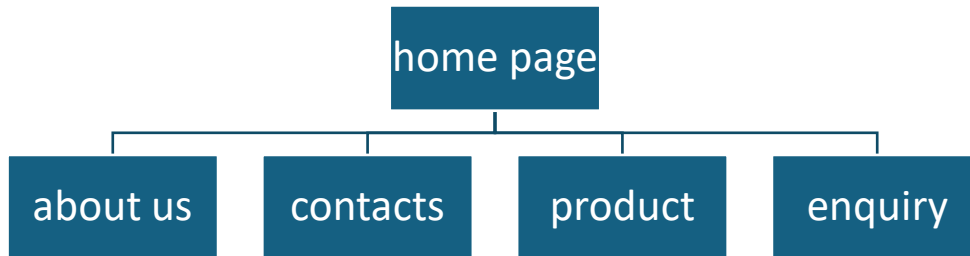

- Order Page: Simple step-by-step process for placing an order with clear options allowing them to choose size, flavor, and delivery information.
- About Us Page: Heartfelt description of who we are, what we value, and our passion for homemade cakes.
- Contact Page: Casual form along with contact information where customers can reach out to questions, custom design requests, or feedback.

5 DESING AND USER EXPERIENCE

- Logo. Branding.
- General aesthetics. Minimalist. Soft colors, uncluttered space. Content heavy. Focus on our cakes and our story.

- Colors. Pastel pink and cream. Friendly and inviting. Accents of purple to give it some personality.
- Typography. Large, sans-serif fonts for headers. Body copy remains clean and easily readable. Fonts will be whimsical yet professional.
- Layout. We will utilize a grid system so that there is a natural flow guiding the user from our hero image to product categories, and contact forms.
- User interface. Simple navigation. Obvious buttons and feedback. Users will always know where they are and how to find what they need.

-

REQUIREMENTS

- Domain Name – A memorable domain such as www.cakehean.com so customers can easily remember our site.
- Hosting – Hosting provider which will help us ensure that our site is available 24/7 with fast load times and security.
- Hardware – PCs/Servers with sufficient storage capacity and processing speed to host our website files and store customer orders.
- Software – We will utilize WordPress which allows us to easily create and maintain our website. Additional software plugins will allow us to accept online orders and secure our website.
- Internet connectivity – High-speed internet connection that will allow our customers to access our website at any time.

- Security – SSL certificates and secure payment gateways will allow us to ensure customer information is safe and our customers can order with confidence.
- Human Capital – Graphic designers, writers, and website developers who can help us create and manage our website.
- Testing and maintenance – Continuous website testing to ensure cross-browser compatibility and mobile-readiness, along with prompt fixes if issues are detected.

7 TIMELINES

- Week 1: Gather ideas & decide on what needs to go on the website
- Week 2: Create a layout & select colours/fonts
- Week 3: Build main pages & add content
- Week 4: Test website and make any adjustments
- Week 5: Launch website & send URL to customers

8 BUDGET

- Domain Name: Purchase website name URL (www.cakeheaven.com) – R500
- Website Hosting: Secure website hosting with back-up and security – R1,000
- Website Design & Build: Build pages and design WordPress template – R3,000
- Content & Photography: Photograph cakes and write product descriptions – R1,000
- Marketing/Branding: Setup social media, create logo and run small ads – R1,500
- Maintenance & Monthly Updates: Website checking each month and small changes – R500
- Cake Ingredients & Supplies: Purchase ingredients and tools for initial orders – R2,000
- Packaging: Boxes, ribbons and labels to package cakes – R1,000
- Contingency Fund: To cover any additional expenses – R500
- TOTAL ESTIMATED BUDGET = R11,000
